40. (New) An electrical connector, comprising:

a molded housing of insulating material;

a stamped insert having a plurality of contacts secured to the molded housing;

a removable tab attached to the stamped insert and removable therefrom by severing along a line of attachment;

means formed in each of said contacts for attaching an electrical wire to each contact; and

a side extension formed on each side of each of said contacts, each side extension being anchored within the molded plastic housing.

41. (New) The connector of claim 40, wherein the insulating material comprises moldable plastic.

42. (New) The connector of claim 40, wherein the insulating material comprises glass.

43. (New) The connector of claim 40, wherein the electrical connector is a strip connector.

44. (New) The connector of claim 40, wherein the line of attachment comprises a scribed line.
